

## **Retired Version of DocuTrac Software**

As DocuTrac strives to keep its products competitive and feature rich, we continually make changes and improvements to programs with each new version of QuicDoc ® and Office Therapy™. If you haven't kept up to date on these changes, please take a look at the Downloads page on our web site. Our customers, who have come to rely on the efficiency new versions our software have brought to their practice, regularly maintain their products to ensure that they stay current with product updates and technical support.

Unfortunately, there comes a time when older versions of software must be retired in an effort to maximize efficiency in product development and support.
