Office Therapy Awarded HIPAA Compliance Certification

DocuTrac, Inc., (DTI) software Development Corporation for behavioral health, was awarded HIPAA Compliance Certification for Office Therapy™. Office Therapy is a practice management program which allows users to file insurance claims electronically.

Certification was awarded in August by the Claredi Corporation, the nation's leading third-party certifier of HIPAA transactions. HIPAA stands for the Health Insurance Portability and Accountability Act of 1996 which governs all healthcare transactions. Certification verifies Office Therapy's ability to electronically transmit HIPAA EDI-compliant transactions, an important consideration for healthcare providers when choosing billing software.

Since acquiring the Office Therapy in February of last year, DocuTrac has overhauled the program, streamlining its functionality, and has implemented HIPAA compliance features including the new ANSI 837 filing format in advance of the target compliance date. The new electronic format was created to allow for easier and more flexible translation between provider and insurance company computer systems, and to allow for coordination of benefits.

DTI, located in Western Maryland and formed in 1993, is a leader in providing software systems for the behavioral health and human service industries. For additional information on Office Therapy and other DTI products visit their web site at www.quicdoc.com or call 800 850-8510.
