Credit Card Processing made simple...

For Office Therapy® Users

Credit Card Processing is now available through our partnership with TransFirst Health Services.

With Office Therapy you can now efficiently process client credit card payments with Visa, MasterCard, Discover, and American Express. We've made this new functionality simple and easy to use.

DocuTrac selected TransFirst Health Services for their expertise in the health care industry. TransFirst works with health care practices and practice management software vendors nationwide and shares DocuTrac's belief that an efficient, competitively priced processing program that is well serviced and easy to use is imperative for handling health care providers' fast growing private pay receivables.

We realize many of you may have a retail based processing program in your front-end office. However, this program is designed to add greater efficiency and work flow for your practice. From within Office Therapy you will be able to process credit card and ACH transactions and payments will be posted directly into the system. Benefits of the program include:

- ✓ **Preferred pricing plan for DocuTrac clients**
- ✓ **Ability to process credit card from within Office Therapy**
- ✓ **Implementation and training for your staff**
- ✓ **No additional software needed**
- ✓ **Comprehensive daily and management reporting**
- ✓ **Complimentary consultation by a dedicated, expert healthcare Provider Consultant**

TransFirst Health Services is prepared to answer your questions, supply additional information or assist in enrolling you into this special program. Please contact TransFirst Health Services for more information.

Call TRANSFIRST at **800-577-8573** or visit www.TRANSFIRST.com

Be sure to mention that you use Office Therapy by DocuTrac

IMPORTANT NOTE: You are required to be running the most current version of Office Therapy and to be current on your Annual Maintenance in order for Credit Card Processing to be enabled. Call DocuTrac at **800-850-8510**, and we will assist you in updating your software and maintenance.
