DocuTrac Partners with Gateway EDI to Benefit Customers

Hagerstown, Maryland January 17 2006 – DocuTrac, Inc. (DTI), Behavioral Health Software Development Corporation, announced today that they have formed an alliance as a Strategic Vendor Partner with Gateway EDI one of the fastest growing health care EDI providers. The partnership was created to enhance the process of filing electronic claims through their Office Therapy™ billing software.

DTI President Arnie Schuster, Ph.D. said, “Through this partnership we will be able to offer our customers the services of a clearinghouse with unsurpassed support and training when filing electronically. In the past, providers were often in the dark as to how to successfully send claims and reduce their claim rejection rate. Gateway EDI offers tools to identify the most common reasons for rejections, and even tracks rejected claims that have not been resubmitted. I especially like the fact that ninety eight percent of their customer service calls are answered directly by a real person, and that their support is available twenty four hours a day, seven days a week.”

Gateway EDI was founded by a practicing physician in 1984. The company has grown by focusing on providers and working on their behalf with both vendors and payers. Currently they submit to over three thousand payers across the country, and provide service to over twenty four thousand providers. For additional information you can visit their web site at www.gatewayedi.com or call 800 969-3666.

DTI was founded in 1993 by a practicing psychologist. The company is committed to incorporating new technologies and advances in their software while keeping it affordable for clinicians. For additional information on DTI products visit their web site at www.quicdoc.com or call 800 850-8510.
