Spreadsheet	MS Excel 2000 of higher required for export of lists and ledgers to Excel)

1. System requirements are for Office Therapy on non-networked system, or on workstation in a networked setting.

2. Windows 2000, 98, ME, and NT are no longer supported by Microsoft and are not recommended. If you wish to see if your version of Windows is supported click on http://support.microsoft.com/gp/lifeselect , or if you want information on Microsoft's product lifecycle policy click on http://support.microsoft.com/gp/lifepolicy.

3. Hard drive space for the database is not included and is dependent on the volume of records. Additional space for the database of at least 20 MB is recommended to start and allow for growth.

4. Wide Area Networks are not recommended for networked versions of Office Therapy. Database corruption and a loss of important data may occur when using Office Therapy in an environment where wireless networking is unreliable. Please consult your wireless networking hardware manuals for recommendations.

5. Report Essentials 2.0 requires Microsoft.NET Framework 2.0 or higher installed on the workstation. It can be obtained from the Microsoft website through a link on DocuTrac's support page: http://www.quicdoc.com/downloads.htm
