<b>Internet Connectivity</b>	Required for Electronic Prescribing, Live-Help Support Service, Acquiring service packs, updates, Report Essentials reports, and QuicForm forms

1. System requirements are for QuicDoc on non-networked system, or on workstation in a networked setting.
2. Windows 98, ME, and NT are no longer supported by Microsoft and are not recommended. If you would like to see if your version of Windows is supported click on <http://support.microsoft.com/gp/lifeselect> . Or if you would like for information of Microsoft's product lifecycle policy click on <http://support.microsoft.com/gp/lifepolicy>.
3. Hard drive space for the database is not included and is dependent on the volume of records. Additional space for the database of at least 20 MB is recommended to start and allow for growth.
4. Wide Area Networks are not recommended for networked versions of QuicDoc. Database corruption and a loss of important data may occur when using QuicDoc in an environment where wireless networking is unreliable. Please consult your wireless networking hardware manuals for recommendations.
